KEY PROJECTS

iLink   Website | Github Repo | Slideshow

- A full-stack app inspired by Linktree which optimises users' social media presence (Tester credentials: coder@test.com, test123)
- CRUD features and preview using iframe
- Tech Stack: React.js, Ruby on Rails API, PostgreSQL, AWS S3 Bucket, PostCSS, MUI, Heroku, Netlify, Rspec, Jest, Cypress

Simple Memo App   Website | Github Repo

- A full-stack simple memo app built with React.js, Node.js, Express.js, and MongoDB Atlas and added styling using MUI
- Implemented CRUD features
- Deployed in Netlify for frontend, Heroku for backend
- Tech Stack: MERN, JavaScript, Mongoose, MUI, Netlify, Heroku

iFund   Website | Github Repo | Slideshow

- A two-sided crowdfunding website in which users can CRUD and donate funding projects
- Features include image upload and retrieval using AWS S3, user login and authentication using Devise, and payment processing using Stripe
- Tech Stack: Ruby on Rails, PostgreSQL, Heroku, Rspec

EMPLOYMENT HISTORY

Translator · Freelance   December 2018 - June 2021

- Transcreated and localised advertising copies and marketing content to effectively communicate with the target market
- Translated and reviewed the contents regularly for specific companies and designer brands as a preferred linguist to provide enhanced translation quality consistently
- Developed style guides for clients to ensure overall consistency

Campaign Coordinator · Amnesty International Korea
May 2013 - November 2017

- Created and localised campaign materials written in English to Korean to enhance public awareness
- Developed on/offline campaign tactics to optimise campaign effect
- Cooperated with other stakeholders, such as media outlets and local organisations to reach out to more potential supporters
